## 1. Laravel/admin_middleware.php

```php
<?php
public function handle($request, Closure $next) {
    if (auth()->user()?->is_admin !== ) {
        abort(403, 'Unauthorized');
    }
    return $next($request);
}
?>
```

## 2. Laravel/email_queue.php

```php
<?php
use Illuminate\Support\Facades\Mail;
use App\Mail\OrderShipped;

Mail::to('user@example.com')->queue(new OrderShipped($order));
?>
```

## 3. Laravel/caching.php

```php
<?php
use Illuminate\Support\Facades\Cache;

$users = Cache::remember('users_list', 600, function () {
    return DB::table('users')->get();
});
?>
```

## 4. Filament/user_table_filter.php

```php
<?php
public static function table(Table $table): Table {
    return $table
        ->columns([
            TextColumn::make('name'),
            TextColumn::make('email'),
            BadgeColumn::make('role')->enum([
```

```php
                'admin' => 'Admin',
                'editor' => 'Editor',
                'user' => 'User',
            ]),
        ])
        ->filters([
            SelectFilter::make('role')
                ->options([
                    'admin' => 'Admin',
                    'editor' => 'Editor',
                    'user' => 'User',
                ]),
        ]);
}
?>
```

5. Filament/approve_action.php

```php
<?php
Actions\Action::make('approve')
    ->label('Approve')
    ->action(fn ($record) => $record->update(['status' => 'approved']))
    ->requiresConfirmation();
?>
```
